

ORBITAL GAS SYSTEMS

ORBITAL INNOVATIVE GAS SOLUTIONS

Orbital Gas Systems (Orbital), an Orbital Energy Group company, is the leader in innovative gas solutions, with more than 30 years of experience in design, installation and the commissioning of industrial gas sampling, measurement and delivery systems. Operating globally within energy, power and processing markets, Orbital manufactures and delivers a broad range of technologies including environmental monitoring, gas metering, process control, telemetry, gas sampling and renewables.

INDUSTRY-LEADING TURN-KEY SOLUTIONS

We work with a growing number of analyzer, metering, odorization and PLC manufacturers to produce industry leading turn-key integrated measurement solutions.

- Oil & Gas
 - GasPT
 - GasPTi
 - VE Sample Systems
 - VE Thermowells
 - BioMethane
 - Odorization
 - Integration
 - Traditional Gas Analysis
 - Supervisory & Control
 - Metering Systems

- Petrochemical & Process
 - GasPT
 - GasPTi
 - VE Sample Systems
 - VE Thermowells
 - Odorization
 - Integration
 - Traditional Gas Analysis
 - Supervisory & Control
 - Metering Systems

- Emissions & Environmental
 - Emission Monitoring – CEMS
 - EU ETS Reporting
 - Integration

Delivering Sound Solutions

Orbital delivers either standardized or custom-built supervisory control and automation equipment for various applications. We provide solutions for monitoring a small process, automating part of a plant or complex DCS systems. To complement our software capabilities, we have manufacturing facilities able to produce supervisory racks for all hardware requirements.

- Hazardous area
- Small process monitoring systems
- Automation
- Complex PLC and HMI systems
- Data acquisition
- Data logging systems
- Metering and flow computer applications
- Analytical control and supervisory systems
- DCS / SCADA applications

Multiple Support Services

Orbital provides in-house support via its service and repair facility equipped with a full range of diagnostic and calibration equipment, and Orbital's Field Service crews are committed to managing and optimizing your operation from beginning to end. Our 24/7 service and support teams are ready to assist with pre-, onsite and post-project technical support and troubleshooting — either by phone or on your location.
