

BACKGROUND

In 2014 Orbital demonstrated its amazing capabilities and completed a massive challenge in the biomethane market.

Orders for seven gas-to-grid biomethane kiosks were placed from CNG services, SGN commercial services and Envitec. Due to high demand and tight customer deadlines, Orbital rose to the task and managed to install and commission all seven individual systems on multiple sites within one month.

Orbital is more than used to achieving tight deadlines for customers and is willing to go the extra mile to bring together and deliver a project no matter how busy.

Recently the company received an order for its 20th biomethane gas-to-grid kiosk. Of these 20 systems, Orbital has designed, built in house and commissioned, there has not been one missed deadline. This record ensures that when you choose Orbital you choose a committed company that promises to deliver a complete in-house designed and built system that will be to specification, on time and ready when you need it.

The Seven

Biomethane To Grid (BtG) System

Seven Installed Biomethane Sites

1. Grants West - Coast Scotland
2. Mitchem - South West London
3. Apsley Farm - Andover Hampshire
4. Cooper Angus - Dundee
5. St Nicholas Farm - Kent Margate
6. Icknield - Oxfordshire
7. White Farm - Isle of Wight
